

Supplementary Figure S1. Expression of GPR30 in the murine abdominal aorta. Frozen sections through the abdominal aorta of female (**A, B**) and male (**C, D**) ApoE^{-/-} mice. Panels A and C depict merged images of DAPI staining (blue, nuclei), elastic fibers (green), and GPR30 (red). Panels B and D show GPR30 staining only. Both female and male mice show no specific staining for GPR30. Scale bar, 100 μm

ApoE – apolipoprotein E.
