

Supplementary Figure S1. Distribution of missing values of all patients

LNE – number of lymph nodes examined, LNP – number of lymph nodes positive.

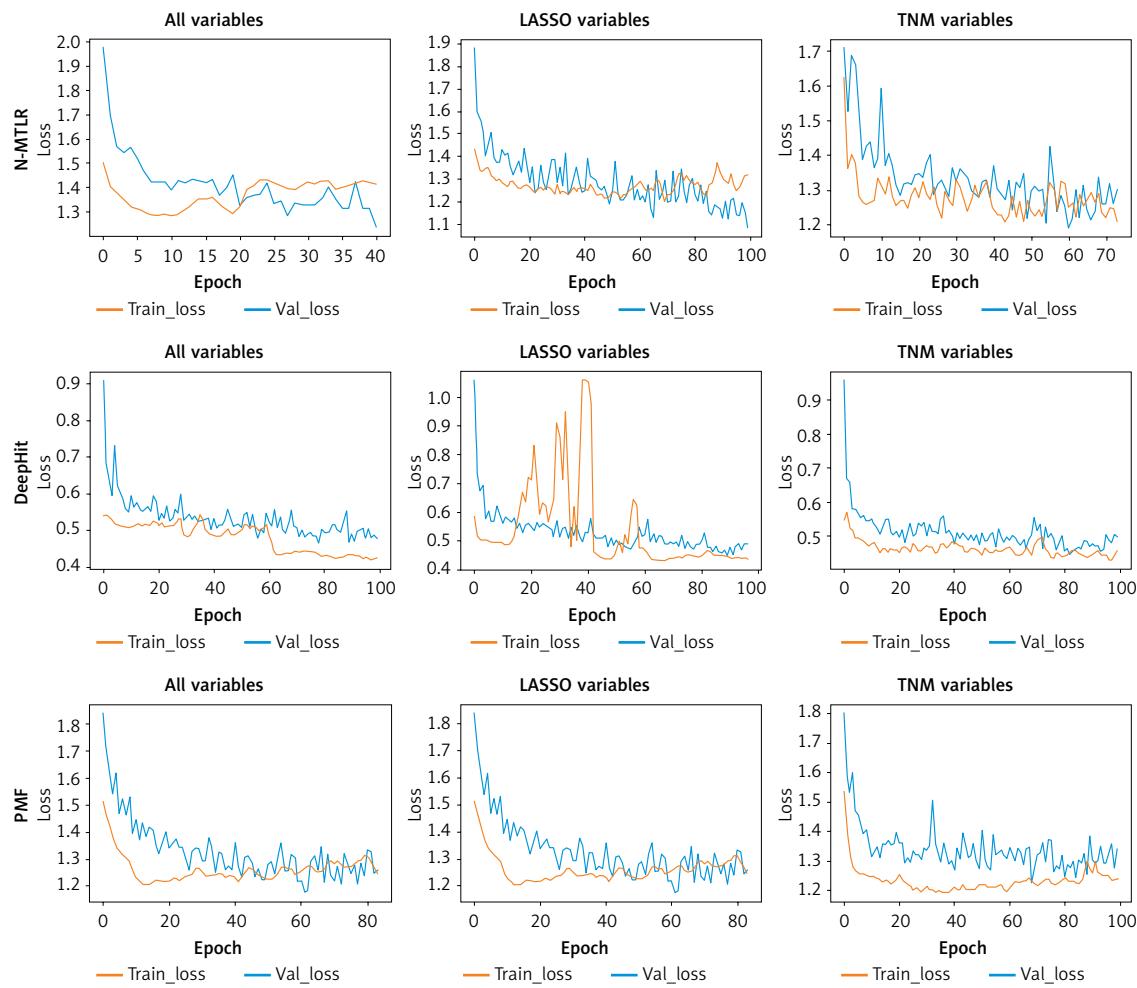

Supplementary Figure S2. Least Absolute Shrinkage and Selection Operator (LASSO) Cox regression was used to filter clinical features. **A** – Search for the right number of predictor variables and λ value. **B** – LASSO coefficient profiles of clinical features

Supplementary Figure S3. Training curves of 8 neural network survival models with callback function to enable stopping trains automatically

CoxCC – Cox case-control corresponding methods. PCHazard – Piecewise Constant Hazard. N-MTLR – Neural Multi-Task Logistic Regression. PMF – Probability Mass Function. LASSO – Least Absolute Shrinkage and Selection Operator.

Supplementary Figure S3. Cont.

CoxCC – Cox case-control corresponding methods. PCHazard – Piecewise Constant Hazard. N-MTLR – Neural Multi-Task Logistic Regression. PMF – Probability Mass Function. LASSO – Least Absolute Shrinkage and Selection Operator.

Supplementary Table SI. Coefficients of variables
in LASSO Cox regression

| Variable | Coefficient |
|----------------------|-------------|
| Sex | 0.000 |
| Age | 0.028 |
| Size | -0.003 |
| Site | -0.057 |
| Grade | 0.539 |
| Lymph nodes examined | -0.058 |
| Lymph nodes positive | 0.196 |
| T | 0.113 |
| N | 0.001 |
| M | 0.734 |
| Stage | 0.038 |

LASSO – Least Absolute Shrinkage and Selection Operator.

Supplementary Table SII. C-index 95% confidence interval from 1000 times bootstrap of different deep learning survival models

C-index, concordance index. Mean – mean C-index. Low – low C-index 95% confidence. High – high C-index 95% confidence. TNM variables: T + N + M + Stage. LASSO variables: Age + Size + Site + Grade + Lymph nodes examined + Lymph nodes positive + T + N + M + Stage. LASSO – Least Absolute Shrinkage and Selection Operator. CoxCC – Cox Case-Control Corresponding Methods. PCHazard – Piecewise Constant Hazard. N-MTLR, Neural Multi-Task Logistic Regression. PMF – Probability Mass Function.
