

**Supplementary Figure S1.** Correlations of (A) body mass index (BMI), (B) systolic blood pressure (SBP), (C) diastolic blood pressure (DBP) (D) fasting glucose and (E) total cholesterol between childhood and adulthood

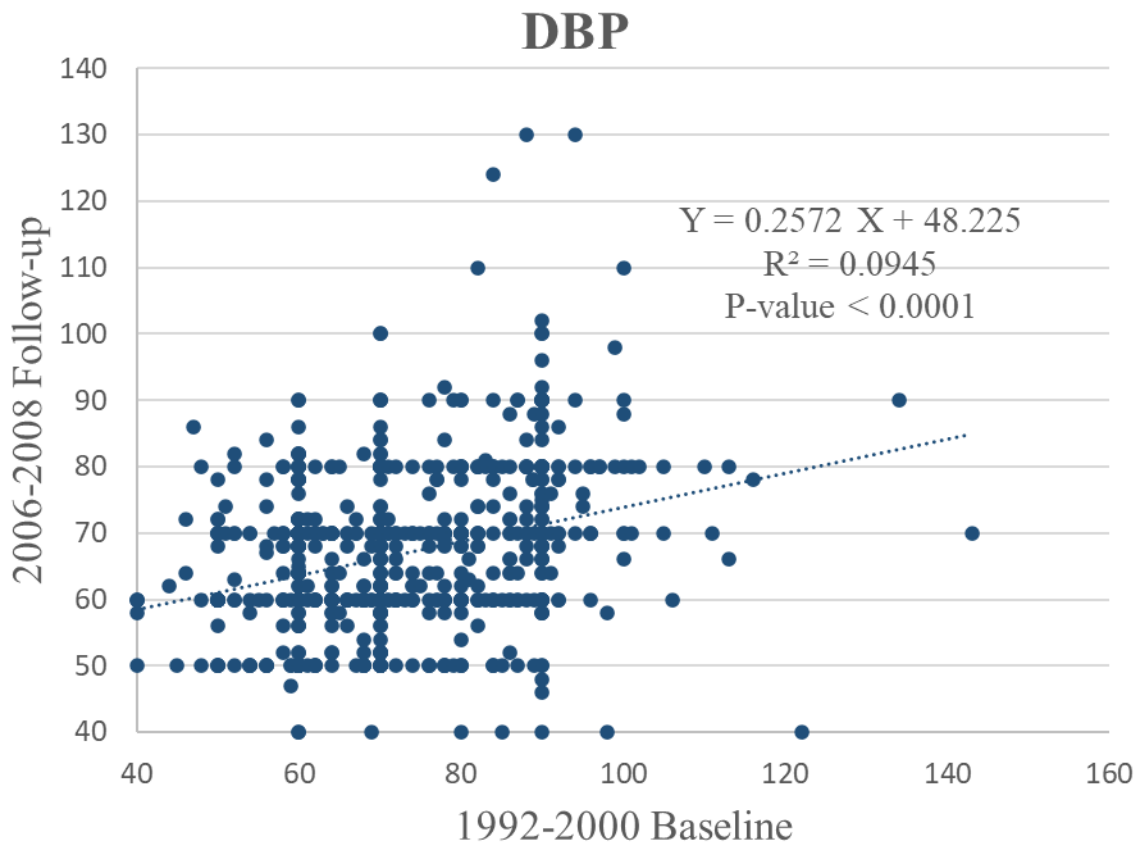

(A) Body mass index values tracking between 1992–2000 and 2006–2008

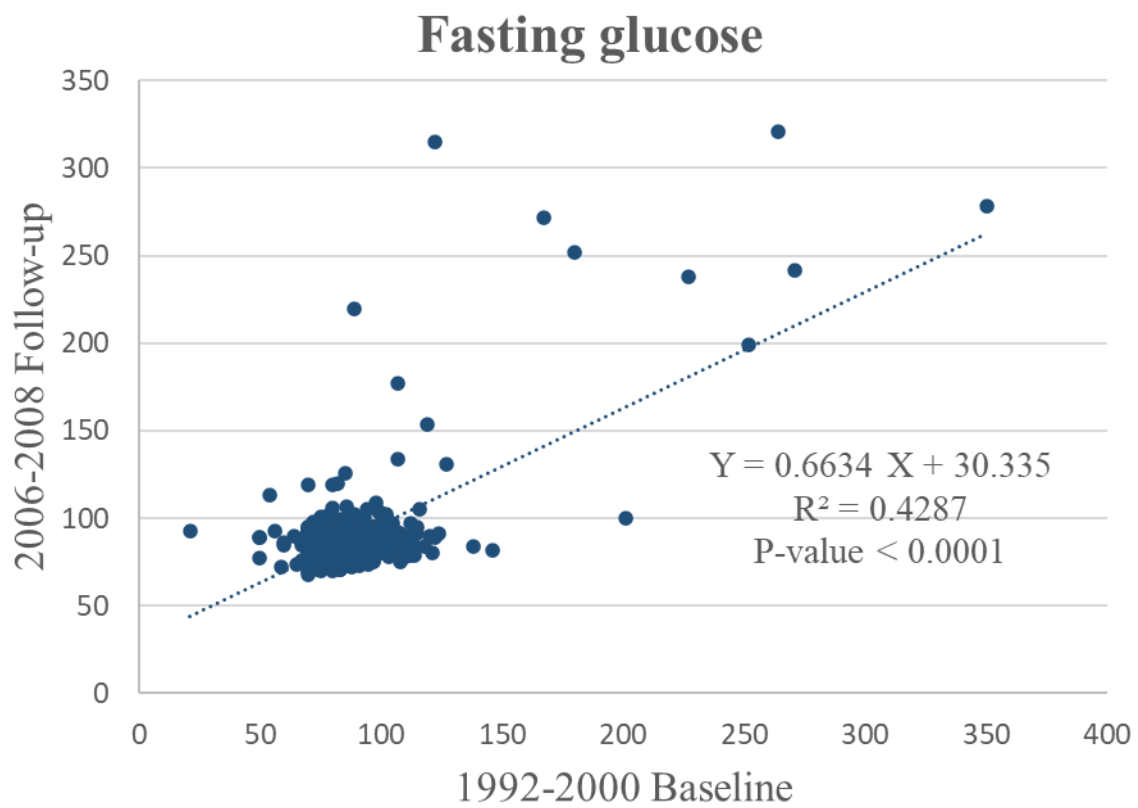

**(B)** Systolic blood pressure (SBP) values tracking between 1992–2000 and 2006–2008

(C) Diastolic blood pressure (DBP) values tracking between 1992–2000 and 2006–2008

(D) Fasting glucose levels tracking between 1992–2000 and 2006–2008

(E) Total cholesterol levels tracking between 1992–2000 and 2006–2008
