

**Asist. David Badovinac, MD, PhD** enrolled in the study of medicine at the Medical Faculty of the University of Ljubljana, where he obtained the professional title as Medical Doctor in April 2014. After successfully completing his studies, he began internship at the University Medical Centre Ljubljana and started abdominal surgery residency in February 2016. He passed his professional specialist exam with distinction in January 2022. In May 2024 he achieved the degree of PhD. During training he attended fellowships at the University Hospital Carl Gustav Carus in Dresden, Germany and at the University of Texas Southwestern Medical Center, Dallas, TX, USA. He now works as an abdominal surgeon at the Department of Abdominal Surgery, University Medical Centre Ljubljana, Slovenia. His surgical and research area of expertise include hepatopancreato-biliary surgery and liver transplantation as well as emergency abdominal surgery.
